Global Perspectives

- 48 Global Dialysis Perspective: Australia**
Matthew J. Damasiewicz and Kevan R. Polkinghorne
- 52 Global Dialysis Perspective: Korea**
Yong-Soo Kim and Dong-Chan Jin

Perspectives

- 58 Apolipoprotein L1 Gene Testing Comes of Age**
Barry I. Freedman and Chris P. Larsen
- 62 Management of Drug-Associated Acute Interstitial Nephritis**
Erin F. Barreto and Andrew D. Rule

Review Article

- 65 Potassium Homeostasis, Chronic Kidney Disease, and the Plant-Enriched Diets**
Biff F. Palmer, Gates Colbert, and Deborah J. Clegg

Clinical Images in Nephrology and Dialysis

- 72 AKI in a Patient with Hemolytic Anemia**
José Antonio Tesser Poloni and Fernanda Hermes Hickmann
- 74 A Patient with Nephrotic Syndrome and Acute Flank Pain**
Mark A. Perazella

On the Cover

Membranous nephropathy characterized by thickening of the capillary loops, due to subepithelial immune deposits, is observed on a light microscopy (Masson trichrome stain, 400x). Figure 1A from **A patient with nephrotic syndrome and acute flank pain** by Mark A. Perazella.
