Original Investigations

Chronic Kidney Disease

1042 Kidney Function, Self-Reported Symptoms, and Urine Findings in Nicaraguan Sugarcane Workers
   Zoe E. Petropoulos, Rebecca L. Laws, Juan José Amador, Damaris López-Pilarte, James S. Kaufman,
   Daniel E. Weiner, Oriana Ramirez-Rubio, Daniel R. Brooks, Michael D. McClean, and Madeleine K. Scammell

Clinical Nephrology

1052 Internal Medicine Residents’ Perceptions of Nephrology as a Career: A Focus Group Study
   Natalie Beck, Seth Furgeson, Michel Chonchol, and Jessica Kendrick

1060 The Nephrology Immersion Classroom for Internal Medicine Residents
   John K. Roberts, Norman W. Seay, Dinushika Mohottige, Aimee Zaas, and Myles Wolf

Cystic Kidney Disease

1068 Adult Inactivation of the Recessive Polycystic Kidney Disease Gene Causes Polycystic Liver Disease
   Whitney Besse, Charlotte Roosendaal, Luigi Tuccillo, Sounak Ghosh Roy, Anna-Rachel Gallagher,
   and Stefan Somlo

Dialysis

1077 How Hemodialysis Patients Perceive the SARS-CoV-2 Health Crisis: Lessons from Austria
   Tamara Davidovic, Hannelore Sprenger-Mähr, Armin Abbassi-Nik, Emanuel Zitt, and Karl Lhotta

1083 Parathyroid Hormone Serum Levels and Mortality among Hemodialysis Patients in the Gulf
   Cooperation Council Countries: Results from the DOPPS (2012–2018)
   Issa Al Salmi, Brian Bieber, Mona Al Rukhaimi, Ali AlSahow, Faissal Shaheen, Saeed M.G. Al-Ghamdi,
   Jamal Al Wakeel, Fadwa Al Ali, Ali Al-Aradi, Fayez Al Hejaili, Yacoub Al Maimani, Essam Fouly,
   Bruce M. Robinson, and Ronald L. Pisoni, for the GCC-DOPPS Study Group

Genetics

1091 Calcimimetic Use in Dialysis-Dependent Medicare Fee-for-Service Beneficiaries and Implications
   for Bundled Payment
   Mark Gooding, Pooja Desai, Holly Owens, Allison A. Pettrilla, Mahesh Kambhampati, Zach Levine, Joanna Young,
   Jack Fagan, and Robert Rubin

1099 From Theory to Reality: Establishing a Successful Kidney Genetics Clinic in the Outpatient Setting
   Andrew L. Lundquist, Renee C. Pelletier, Courtney E. Leonard, Winfred W. Williams, Katrina A. Armstrong,
   Heidi L. Rehm, and Eugene P. Rhee

Functionally Essential Tubular Proteins Are Lost to Urine-Excreted, Large Extracellular Vesicles during Chronic Renal Insufficiency
Ryan J. Adam, Mark R. Paterson, Lukus Wardecke, Brian R. Hoffmann, and Alison J. Kriegel

First column: Proteomic analysis identified the plasma membrane transporter megalin in LRT-EVs. Representative immunohistochemistry of kidney tissues collected 10 weeks post-surgery show presence of megalin (red) localized at the base of the brush border on the apical membrane in sham-operated (sham) rats. In 5/6Nx rats megalin can be seen in LRT-EVs that are within the tubule lumen and LRT-EVs emerging from the proximal tubule cells. The distribution of megalin is diffuse (yellow) or absent in some tubular cells. Image on bottom is an inset from center image. DAPI, blue; autofluorescence at 455 nm (green); Cal. bar = 50 μm. Adapted from Figure 2 of “Functionally Essential Tubular Proteins Are Lost to Urine-Excreted, Large Extracellular Vesicles during Chronic Renal Insufficiency” by Ryan J. Adam, Mark R. Paterson, Lukus Wardecke, Brian R. Hoffmann, and Alison J. Kriegel. KIDNEY360 1: 1107–1117, 2020. doi: 10.34067/KID.0001212020.
