Review Article

Adding Life to Their Years: The Current State of Pediatric Palliative Care in CKD
Taylor R. House and Aaron Wightman
Plain X-Ray of this patient’s affected foot demonstrates severe vascular calcification. Plain (oblique) X-Ray of this patient’s affected hand show severe extensive diffuse vascular calcification in medium-sized and smaller arterial blood vessels characteristic of CUA. Adapted from figures 1 and 2A in “Ulceration and Necrosis of Fingers and Toes in an ESKD Patient” by Raymond Simon Piggott, George Mellotte, and Donal J. Sexton. KIDNEY360 2: 1074–1075, 2021. DOI: 10.34067/KID.0000342021.
