1392 Unusual Kidney Findings in a Patient with Abdominal Pain and Kidney Dysfunction

Filipa Ferreira, Miguel Relvas, and Luís Vale

On the Cover

CT scan (coronal plan) demonstrated huge staghorn calculi within both renal pelves. The right kidney shows a diffuse and severe reduction of parenchyma's thickness, with dilated calyces (*). Fluid was noted in the peri-renal space, mainly along the inferior pole (arrow). These are radiographic signs of xanthogranulomatous pyelonephritis.
